

SUMMARY

AI & computer-vision engineer who also builds and ships web front-ends. I turn detection, OCR, image-enhancement and 3D-reconstruction problems into deployable systems, and ship the interfaces around them. Fast learner, dependable teammate. Trilingual (English, Mandarin, Indonesian) with basic Japanese.

SKILLS

AI & Machine Learning	PyTorch, TensorFlow, Scikit-Learn, ClearML, model training & deployment
Computer Vision	MMDetection, MMPose, MMDetection3D, YOLOE, PaddleOCR, object detection, image/video enhancement, dehazing
3D & Neural Reconstruction	NeRF / Nerfstudio, image-to-3D, NVIDIA Cosmos Reason
Front-End & App	React, Vue, TypeScript, JavaScript, Node.js, Quasar, Capacitor, HTML/CSS
Programming & Tools	Python, C, C++, Java, C#, SQL, Git, Linux, Selenium, Visual Studio
Game Development	Unity, Blender
Languages (spoken)	English, Mandarin, Indonesian, Japanese (basic)

EXPERIENCE

AI Engineer — Current employer (name withheld) May 2025 – Present · Tainan, Taiwan

- Applied computer-vision & 3D R&D: evaluated and built with MMDetection, MMPose, MMDetection3D, YOLOE and PaddleOCR; image-to-3D reconstruction (Nerfstudio) and NVIDIA Cosmos Reason; ClearML for experiment tracking / MLOps.
- Since Mar 2026, took over the front-end after the team's front-end engineer left — building and maintaining the company's desktop application and web front-end in React.

AI Modeling Engineer — 岳揚智控股份有限公司 (AI MachineVision Corp) Aug 2024 – Apr 2025 · Taichung / Taoyuan, Taiwan

- End-to-end AI modeling: data collection, labeling, model building, classification, validation and prediction; on-site client technical support.
- Collaborated with Arc'teryx on their automated AI fabric-inspection system; helped optimize models to improve detection accuracy and throughput.

English Teaching Assistant & TOEIC Question Author 2023 – 2024 · Kaohsiung, Taiwan

- Taught English classes and authored / reviewed TOEIC exam materials.

PROJECTS

Moneta — Multi-currency personal-finance app (Android): local-first wallets, budgets, goals, recurring bills, on-device receipt OCR, encrypted cloud backup, trilingual UI.
Vue 3, Quasar, Capacitor, TypeScript · github.com/Zen1th7/moneta

Video Dehazing — removes haze per video frame (dark-channel prior + guided filtering).
OpenCV, Python · github.com/Zen1th7/dehazing

The Hash-Slinging Slasher — lantern-lit exploration horror game.
Unity, C# · zenith67.itch.io/the-hash-slinging-slasher

Counterfeit Money Detection — YOLOv5 object detection that locates and crops banknote regions to flag counterfeits.
Python · github.com/Zen1th7/counterfeit_money

THSR Booking by Voice — books Taiwan High-Speed Rail tickets by voice: speech recognition + Selenium automation + CAPTCHA handling.
Python · github.com/Zen1th7/captcha-detection

EDUCATION

B.Sc. Computer Science — National University of Kaohsiung · Sep 2020 – Jun 2024

LEADERSHIP

Event Organizer, NUK Indonesian Students Association · 2021 – 2022
Planned orientation, farewell, game and BBQ events; managed logistics, budget and scheduling.

CREDENTIALS

TOEIC 905 / 990 (2023) · CPE (Collegiate Programming Exam), 2022
